## A Quality Product

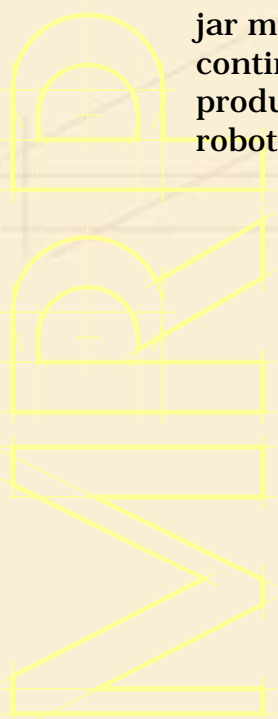

Mold-Rite Plastics produces a quality product that meets or exceeds our customer requirements through continuous quality improvements at a competitive price.

**M**old-Rite Plastics Inc. was founded in 1976. Mold-Rite has continued to grow by investing in state of the art technologies and a high level of commitment by quality conscious employees.

Strong partnerships with our distributors have made Mold-Rite a leader in the plastics closure and jar markets in North America. Our continued efforts to provide quality products has led to the use of robotics throughout our facility.

Using advanced Computer Numerically Controlled (CNC) machinery, enables our **highly skilled** Tool Room to handle your custom projects, from CAD design to finished mold.

With over 90 injection molding machines, ranging from 55-350 tons, and over 500 molds, lead times on orders are greatly reduced.

## Custom Lining Capabilities.

Mold-Rite carries a large lining material inventory, with a wide variety of liners ranging from regular backed liners to custom liners that meet unique specifications. Technical specifications and liner samples for testing are provided in a timely manner, thus helping our customers make ***informed decisions***.

Mold-Rite has established relationships with our liner vendors to help ensure quick responses to your liner questions or problems.

Our Lining Department has successfully handled thousands of custom lining projects through the years.

Call and speak to a Customer Service Representative for information on our liner capabilities.
