## **CORONAVIRUS/COVID-19 Update – Mold-Rite continues focus on the Safety of our employees while increasing production**

Mold-Rite continues to closely monitor developments and take aggressive measures to protect our employees while servicing our customers.

All three Mold-Rite manufacturing facilities, Plattsburgh NY, Somerset NJ and Twinsburg OH have been designated as essential product providers. We take that responsibility very seriously and are working to ensure we keep our factories operating at full capacity to support critical segments. A recent article in the *Plattsburgh Press-Republican* explains how our New York manufacturing facility is demonstrating this. Click [HERE](#) to read the article.

We continue to take actions to ensure the health and safety of our employees with implementation of necessary enhancements to our policies and procedures and regular communications. Action is ongoing around the following and we are staying connected to all available resources to add precautions, as necessary, based on the daily revelations and learnings:

- All non-operational positions have been transitioned to work remotely, as feasible, to minimize the number of people in our facilities.
- Thermal scan thermometers have been installed at all entrances to our facilities to prevent anyone from entering with any heightened temperature per CDC guidelines.
- All employees have been educated on the proper hand washing, safe distancing and sanitization procedures to minimize exposure.
- Enhanced sanitization and cleaning procedures are proactively conducted.
- Continuous monitoring and implementation of conservative quarantine and cleaning procedures are in place to protect employees who may have been exposed.

These measures have been effective but we will continue to monitor and adjust as needed.

Additionally, we remain committed to ensuring that there is no interruption in service to our customers. Mold-Rite operates exclusively in the United States with raw materials sourced exclusively within North America. To date, we have not experienced any interruptions or disruptions to our operations or supply chain because of this virus. By ensuring the safety of our employees and maintaining a reliable raw material supply chain, Mold-Rite Plastics remains positioned to continue to provide the most responsive, flexible, innovative and reliable service you have come to expect.
